day.

Already it has made obselete between 3,000,000 and 4,000,000 of muskets in Europe that were built to shoot black powder, not to speak of the millions of a cartridges, all of which the countries possessing would be willing to sell for a song. Here is a vast sum of wasted capital, but it is the inevitable result of progress. Our army guns in this country will soon be in the obsolete category, for to keep pace with the rest of the world we will have to adopt smokeless powder, too. A gun loaded with it will send a built just twice as far as the black powder does. Again, the new invention changes military tactics entirely, for in the battles of the future troops will never display themselves en masse to the enemy. Open fighting, as has been customary through all the ages, is a thing of the past, for it would mean utter annihilation. If smokeless powder had been in use during the late civil strife the war between the States wouldn't have lasted innety days."

LIGHTING A BIG BRIDGE.

Facts About the New Structure Across the Thames.

Across the Thames.

London's new Tower Bridge has been attracting very general attention of late, and many accounts descriptive of the structure have appeared in the periodicals and newspapers. The bridge was opened for traffic on the 9th of July. Gas is used exclusively, says Progressive Age, throughout for the illumination of the bridge proper, and its approaches. A committee having this matter in hand, after due consideration of the claims of gas and electricity, decided unanimously in favor of gas as being by far the best method for the perfect lighting of the structure. No less than 200 high candle power gas lamps have been placed on the bridge, and it is said that the illumination is so intense that the pedestrian can, without inconvenience, read type of the ordinary newspaper. At the north approach forty hexagonal gas lamps have been mounted on handsome cast-iron standards upon the parapets, and like provision has been made at the south end.

THE FIRST IRONCLAD.

An Armored Warship Built as Far Back ns 1585.

Back is 1585.

The idea of protected ships, such as the modern men-of-war, is by no means an absolutely new one. This is proved, says the Western Mall, of Cardiff, by the fact that an armored vessel was constructed, though crudely, of course, as for back as 1585 by a shipwright of Antwerp during the wars between the Spaniards and the Dutch. The greater part of the Netherlands had come into the possession of the House of Hapsburg in 1477, but in the early part of the sixteenth century it passed to the Spanish Crown.

possession of the House of Hapsburg in 1977, but in the early part of the sixteenth century it passed to the Spanish Crown.

At this time the principles of the Reformation had spread throughout the lowlands, and when the Spaniards instituted the Inquisition there disturbances broke out. The Spanish soldiery pillaged the towns of the Netherlands in their work of suppressing the rebellion, and Antwerp, being a margraviate, suffered greatly. In the Summer of 15%, it was invaded by the Spaniards, both by land and water, and the people of Antwerp built the first protected ship on record in an attempt to break through the line of the besiegers on the river. It was a craft of unusual size, with flat bottom, its sides armed with iron plates fastened into great beams of wood.

When finished the builders thought it a floating castle, impregnable to the artillery and missiles of those days, which should crush all opposition, as it contained a great number of men, some of whom were placed like sharpshooters in the tops of the masts, and the rest protected by the bulwarks.

They were so confident that the craft would rout the enemy that they called it "Finis Belli," thinking it no doubt would put an end to the war. Unfortunately, however, the early ironclad proved a disastrous failure, getting stuck upon a bank of the Scheldt after a very short and unhappy career. The Spaniards were greatly amused with the untimely end of the great vessel, while the brave burghers of Antwerp changed the hame from Finis Belli to Perdito Expensal, or Money Thrown Away.

The crew then deserted the ship, and the Spaniards, after defeating the Netherlanders in a navsi, battle, carried the monster in triumph to the camp of Alexander of Parma, where it became one of the sights of the times. "Now, you had better stop here," she said after they had gone nearly a mile. "For after you pass that timber they can see you from the ford. By this time they may have sent some soldiers up there, and they will shoot you if you pass that point."

So Forrest dismounted, and accompanied by several of the officers at the nead of the column advanced to the timber, and was peering around it when the enemy at the ford opened fire upon them. He was amazed and alarmed when the little girl darted past him, and, spreading out her little frock, cried:

There is nothing like an international contest for producing bursting enthusiasm, says the English Court Journal, and we have never had a scene upon any we have never had a scene upon any English athletic ground to equal that which was witnessed on Monday, the occasion of the Oxford and Yale sports at Queen's Club. The stand where the American visitors had chosen to muster had a strange aspect: it was filled with people more or less smart, but all intensely patriotic.

The outward symbols which marked the partisans of Yale were blue slik cloths embroidered with the name of the American university; these the ladies hung over the front of the stands or caught up to wave when occasion required. Cornflowers in huge market bunches were hung about the persons of the "Yaleites," regardless of effect or expense. The men presented a most undignified appearance, with the "Stars and Stripes" tied to their umbrellas or bundled under their arms, ready to be produced and waved in the faces of the crowd.

It must be admitted, however, that if the "Yale" partisans were over-demonstrative, certain elderly Britons could scarcely contain themselves, and when the Union Jack was hoisted released themselves with cries of "Ha. ha, England" accompanied by endeavors to lose their hats in the crowd, and other gambols. any English athletic ground to

(Special to The Evening World.) NEW BRUNSWICK, N. J., Aug. 16.-The storm of last evening raged with unusual violence in this city and viciniparalyzed, and of the six trunk telephone barns were struck by lightning and sev-

barns were struck by lightning and several persons were struck by lightning and several persons were stunned. No fatzlities were reported.

At Hoynton Beach, a day Summer resort near here, the Sunday-School excursionists from this city huddled together in the dancing payllion during the storm. Lightning struck the wooden building and huge sheets of flame played about the grounds, presenting a terrifying spectacle to the hundreds of childern and their parents.

Many ran out of the building into the drenching rain. Once an electric shock seemed to pass through the whole crowd and many screamed in terror.

The railroad tracks on the Long Branch division were washed out of South Amboy, causing a delay to all trains, of two hours.

NEWARK, N. J., Aug. 16.—The centre of last night's storm seemed to break over the little town of Caldwell, and there was considerable damage done by both the wind and the lightning.

About 6 o'clock, when the storm was at its height, lightning struck the large barn of Lamuel Stager on the outskirls of the town. In a moment the structure was in a blaze, and before the neighbors reached the scene the barn and outbuildings, together with the hay barracks, were on fire. The horses and cows were saved, but all of the wagons were burned. The lors as about \$1,000, partly insured. Many trees were struck by lightning. The storm was very sever by lightning. Joseph Neugebauer, of 489 South Tenth street, Newark, is the father of two daughters, Lizzie and Barbara, respec-tively eighteen and sixteen years old. Both girls had a penchant for dime museums, and frequented a palace of freaks on Market street. Here, it is said, Lizzie's artistic soul was stricken by the fresco work which covered the tattooed

Hartmann's honeymoon had shone but ten days before his high-kicking bride charged him with undue familiarity with the ossified lady, whose heart seemed not at all affected by the process which converted her into a statue. He retaliated with an accusation of bigamy. The result seems to have been that Hartmann deigned to smile upon the enamored Lizzle, although her stern parent forbade him the house. Yeaterday the couple were strolling together, when Neugebauer came upon them. While his hand was uplifted in tragio style, Hartmann whipped out a marriage certificate before the astonished father's gaze. It proved that they had been married on Monday by a Justice of the Peace.

father's gaze. It proved that they had been married on Monday by a Justice of the Peace.

Barbara's love affair had ripened on that same evening, and the amazed father was informed that she also had been tied for life to her museum acquaintance.

Now, Neugebauer doesn't realize just where he is at, but has renounced both daughters, as a preliminary step. Hartmann, it appears, has been daily visiting the museum, and the high kicker has continued to fume at his flirtations with the ossified lady.

Hartmann's father-in-law seems to consider that the proper caper is for her, to take the initiative and begin bigamy proceedings against her much-wedded spouse.
